

## Health IT Quick-Stat # 11

### Percent of Individuals Provided Direct Access to Clinical Laboratory Test Results

2012

#### Summary:

Approximately 3 in 10 individuals (32%) reported that clinical laboratories had provided them direct access to test results, either in paper or electronic format, during the past 12 months in 2012.

#### Source:

Office of the National Coordinator for Health Information Technology Survey of Consumer Attitudes Toward the Privacy and Security Aspects of Electronic Health Records and Health Information Exchange, 2012

#### Notes:

Based upon response to survey item, "During the past 12 months, has a clinical laboratory given you direct access to any test results, such as blood test results, in either paper or electronic format?"
